

INTERLOCK:

Interlock knitting (or Double Knit) fabric is a specific weave of knit fabric. Without going into technical details, it's like two pieces of Jersey knit, back to back, with the same thread. Out of all the knitted fabrics, it is usually the softest and the best quality. The front and back of the fabric look the same. It also hangs much better than cheaper knits, however it does tend to pile more.

Cotton interlock is a wonderful fabric. It is extremely soft, very warm and a little stretchy, making it perfect for garments. It is warmer than cotton jersey or rib knit because it has a double-knit construction, making it thicker and heavier than a single knit. It also provides anise flat surface for printing or transferring designs and it dyes perfectly.

Interlock fabric is like a rib knit with ribs on both sides but then has additional threads running against it, giving it more stability and making it much easier to sew. It has an approx, 25%-35% stretch 'across the grain' and can be used for all types of apparel projects including t-shirts, shorts, jimmies, infant clothes and layette.

No	Fabric Name	Construction	Width	Picture
